This Single-Early Tulip is a brilliant dark rose, with edges of a lighter shade, opening out a still lighter rose. The flowers are large and round with the petals exquisitely crinkled. Lovely in the garden and also a forcing variety of great merit. Very popular and in great demand.

Fred Moore. Doz., 60c; 100, \$3.50; 1,000, \$32.00
(12 in.) Soft, dark orange tinted with rose. The unusual color gives this Tulip an especially artistic value either for forcing or for cutting. Other virtues it also possesses in its tall stem, its fragrance, and its size; neither too large nor too small.

(14 in.) Very deep golden-yellow, large flowers of good form on a fine stem. Very popular for early forcing.

Gold Finch. Doz., 70c; 100, \$4.75; 1,000, \$42.50
(14 in.) Pure, deep, unfading yellow. A sport of the old favorite, Yellow Prince, and an improvement, in that it has no brownish streaks, which made the original not so desirable as a bedder. Gold Finch forces easily and early and has a distinct fragrance. Its lasting qualities as a cut flower makes it especially attractive to the amateur as well as to the commercial grower. As a Tulip of distinction for bedding purposes it received the unqualified praise of the visitors at an Exhibit.

La Reine (Queen Victoria). Doz., 50c; 100, \$3.25; 1,000, \$27.00
(13 in.) White, faintly flushed with rose. As a forcing Tulip it is without a rival so far as the delicate tints are concerned. If forced quickly, it shows almost no color but if the forcing is more gradual, the much desired exquisite shade of pink appears.

Doz., 70c; 100, \$4.75; 1,000, \$43.00

(13 in.) A choice flower for those who seek a distinctively artistic feature in the Spring garden. Nothing in the way of a Tulip is lovelier than Le Reve, surrounded by the tender green of early foliage. Its beauty of color and form cannot be adequately described. Pink Beauty.

Doz., 95c; 100, \$6.75; 1,000, \$65.00

(13 in.) A wonderfully attractive Tulip, especially for bedding purposes. The color is a brilliant cherry-red, feathered through the center with creamy white. The flower is large and of beautiful form held erect on a strong stem. It is not wise to attempt a too early forcing.

Prosperity.

Doz., 55c; 100, \$3.50; 1,000, \$32.00

(12 in.) A soft, rosy pink, darker than La Reine of which it is a sport. Excellent for very early forcing.

Queen of the Netherlands.

Doz., 60c; 100, \$4.00; 1,000, \$37.50

(14 in.) A very beautiful soft rose, with pale yellow base. One of the largest and finest for forcing. Should not be forced too hard in order to keep its lovely color and because of a weak stem. Makes a good showing when grown in pans.

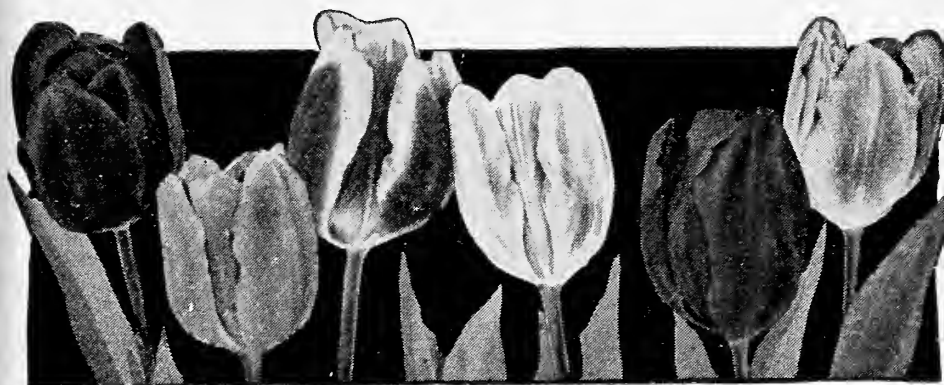

Rising Sun.

Doz., 70c; 100, \$4.75; 1,000, \$45.00

One of the largest early Tulips in existence; very tall stem. Color, deep golden yellow. A beautiful variety.

- Yellow Prince.** Doz., 65c; 100, \$4.25; 1,000, \$40.00
(12 in.) The leading golden-yellow. When forced it always keeps its attractive closed form and is a splendid keeper. It is good for both early and late forcing and the length of the stem makes it especially useful for cutting. When grown outside it sometimes develops streaks of brownish-red which rather detracts from its beauty.

TULIP IN MIXTURES

Our mixed Tulips will be found of much higher grade than those ordinarily sold. Their colors are bright and attractive, while in height and period of bloom they will be found almost, if not entirely, similar in character. Planted in large beds or masses they produce a brilliant effect.

Single Early. Superfine Mixed.

Doz., 50c; 100, \$2.50; 1,000, \$22.00

Double Early. Superfine Mixed.

Doz., 55c; 100, \$2.80; 1,000, \$26.00

PARROT TULIPS

While fully as hardy as other varieties, Parrot Tulips are very late bloomers. They should be planted where they will receive the full effect of bright sunshine, as the stems are inclined to be weak if grown in slightest shade.

The flowers are of unusual size, and exceedingly brilliant coloring, ranging through all shades of golden-yellow, green and crimson; striped and flushed most gaudily. The edges are curiously and deeply cut and fringed, giving to the flowers a strangely attractive appearance. They are very interesting as cut flowers.

BOTANICAL VARIETIES

Clusiana. Doz., 65c; 100, \$4.50; 1,000, \$40.00

(8 in.) "The Little Lady Tulip" as it is also called, flowers about two weeks after Kaufmanniana, and is another of the littlest ones. The outside petals are white with a reddish flush down the center. Inside the petals are creamy-white with a violet base. Tuck them away among rocks or stones in a warm sheltered corner. They are very lovely springing up out of a bed of Phlox Divaricata. Plant 5 or 6 inches deep in ordinary soil and 8 or 9 inches deep in light soil.

Eichleri. Doz., \$1.85; 100, \$13.00; 1,000, \$120.00

Bright scarlet, shaded orange, very large flower. Highly recommended.

Kaufmanniana. Doz., \$1.65; 100, \$11.00; 1,000, \$100.00

(10 in.) This has a flower of very good size for so small a plant. The color is a pale primrose, with little flecks of crimson or dull red on the outside of the petals.

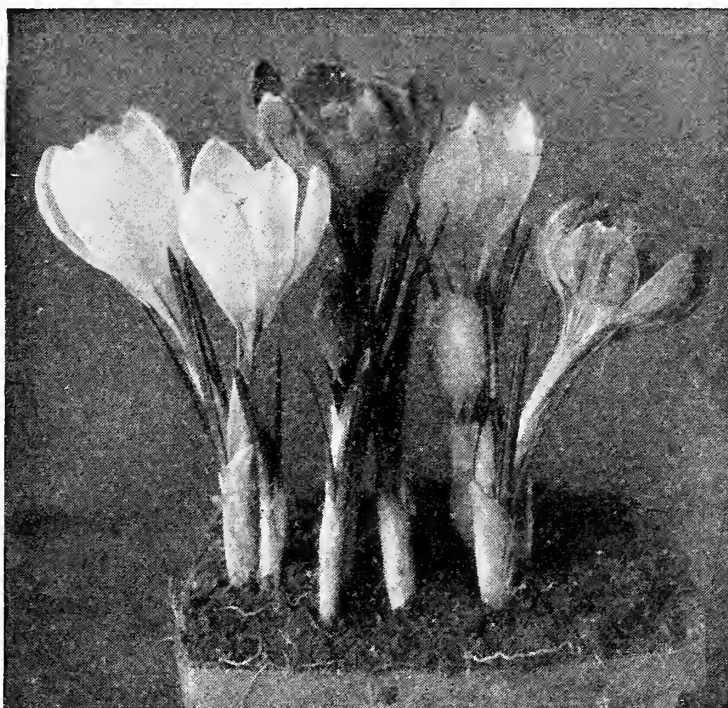

Its real beauty, however, lies within. As it opens out its reflexing petals there is disclosed a base of lovely glowing yellow.

We must confess that it has a habit of closing its petals in dull or cloudy weather.

Marjoletti. Doz., 65c; 100, \$5.00; 1,000, \$45.00

(12 in.) Softest primrose in color, shading to red at the base. Small, but very beautiful. Flowers about the same time, or a little later than Clusiana. Needs the same care.

CROCUSES

The Crocus is a transient thing, but in its place as one of the very earliest flowers of Spring it is well beloved.

Scattered through large beds of blue Scilla the yellow and white varieties make a charming display.

The Crocus is used quite extensively for naturalizing where the grass is not to be clipped. Plant fully 4 inches deep and not closer than 2 inches.

Miscellaneous Import Bulbs

The Bulbs listed below are permitted conditional entry from abroad by the Federal Horticultural Board, at its pleasure. How long they will be available, is problematical, but we have them for this season, at least.

Crown Imperial

CROWN IMPERIALS (*Fritillaria Imperialis*)

Although the bulbs succeed fairly well in any ordinary border, a rather strong, adhesive soil, in an open position freely exposed to the sun, should, if possible, be chosen for them.

Doz., \$1.60; 100, \$11.00; 1,000, \$95.00

FRITILLARIAS (*Meleagris*)

The Fritillarias are perfectly hardy and thrive in shady borders, where they remain undisturbed for at least three years. The pendent bell-shaped flowers vary in color, and as a rule are handsomely spotted.

Doz., 60c; 100, \$4.50; 1,000, \$40.00

FEATHERED AND GRAPE HYACINTHS

These Hyacinths will grow in any good garden soil, and are excellent for borders that are shaded by trees. They should be planted in large clumps, and be allowed to remain several years undisturbed. They are also well adapted for pot culture and for rockwork.

FEATHERED HYACINTHS (*Muscari Plumosus*)

Pretty pale mauve. **Doz., 50c; 100, \$3.25; 1,000, \$30.00**

COLCHICUM

Blooms without vase, soil, water or care. Unique for table, room, or window decoration. Rosy-tinted blossoms shading to a pearly white and exhaling a refreshing fragrance.

Simply place the bulb in a dish, bowl, saucer, or on the table or window sill in a little light and watch its beauty unfold. As the blooms fade and drop, cut them off and others will follow in quick succession, each bulb producing from six to fifteen flowers.

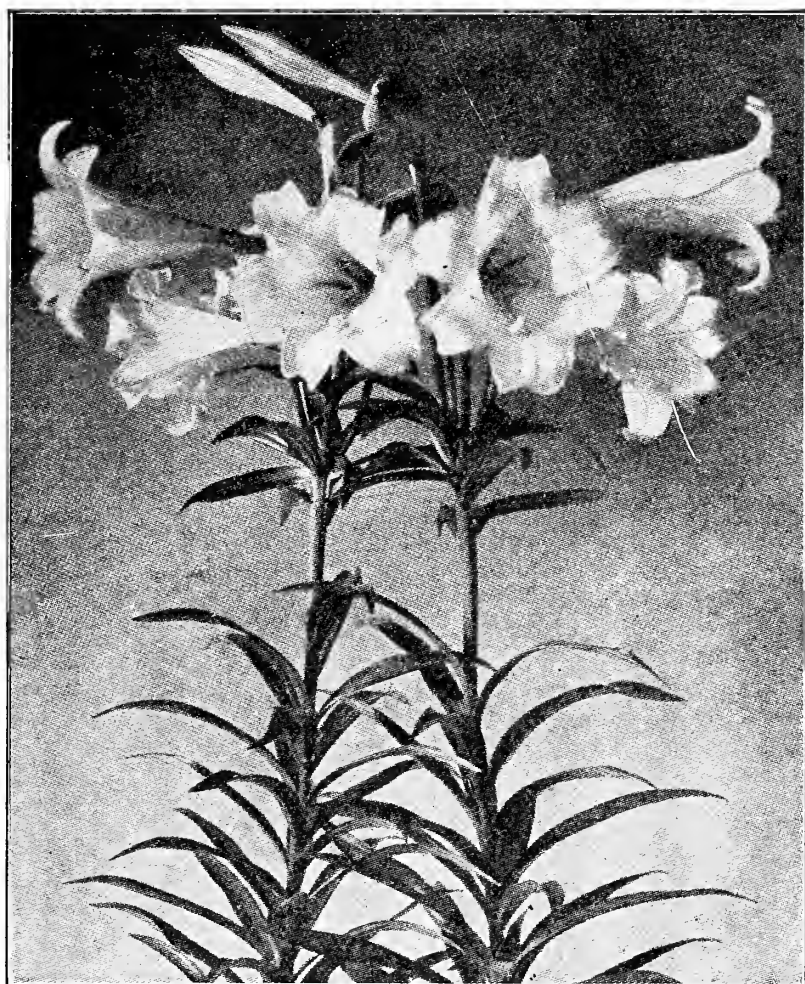

When the blooming has ceased, the bulbs may be potted or planted in the open garden or lawn, where the following spring they will develop a beautiful broad, deep-colored foliage.

Remove from bed about July 1st, dry the bulb in the darkness for a few weeks, and use for indoor decoration as at first.

These bulbs are very useful for border planting and can be planted out in the open ground after they are through blooming. If planted in fertile soil they will reproduce themselves each year and will make an attractive display of flowers in the fall.

We know of no other flower that will be as interesting and will give you the pleasure these bulbs will. Be sure to try some of them this year.

Each, 35c; Doz., \$3.50; 100, \$25.00

LILIES

Most Lilies form two sets of roots—one set below and the other above the bulb. For best effects place the bulbs in clumps of six or more, with at least an inch of sand beneath, over, and around each one, then cover with soil. Lilies love ample drainage. Good results have been obtained by digging a hole in the garden deep enough to allow the placing of a 6-inch flower pot, inverted, therein and filling in around the pot with sand or gravel. Plant your bulb on top of the inverted pot and see that the top of the bulb is at least 6 inches below the surface. This would mean that the hole would have to be at least 14 inches deep. Although these Lilies are generally known as hardy, it is advisable to cover the surface with leaves or litter in late fall as a protective measure against frost.

Lilium Candidum. (Madonna Lily).

Each, 50c; Doz., \$4.75; 100, \$35.00

It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lilies. Blooms out-of-doors early in July.

AMERICAN BEAUTY—A most distinct and valuable variety. It is similar in type of flower and growth to the well-known Late Branching Asters, but differs in that all the large blossoms are produced on much longer and heavier stems. It is the first of a new strain of late branching habit, and of robust growth. Plants will average two and one-half to three feet in height, according to location, while the immense flowers, usually four to five inches in diameter, are often borne on heavy stems which may be cut two feet in length.

Our aim is to furnish the best Pansy Seed obtainable. Trade pkt., 30c; ⅛ oz., \$1.25; ¼ oz., \$2.25; ½ oz., \$4.00; oz., \$8.00.

SWEET PEAS

Spencer Varieties

"BUTTERFLY" or "ORCHID FLOWERED"

This type of Sweet Peas is very largely taking the place of the common or grandiflora sorts. The flowers are larger, often measuring 2½ inches across. Their beautiful waved petals are borne in clusters of 3 or 4 on long, strong stems, adding so much to their value as cut-flowers. The varieties that we are listing here are those which we consider the best of their color, and include some of the very recent introductions of special merit.

INSECTICIDES AND FUNGICIDES

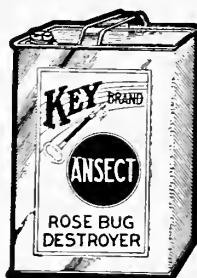

Insects may be grouped into two classes: First those insects such as aphid, scale, red spider, white fly, thrip, mealy bug, etc., which damage the plant by sucking the juice, and to combat this group either a direct-contact spray, which will corrode their bodies or stop their breathing pores, is used, or a fumigating material which will suffocate them.

The second class comprises those insects which chew the foliage, such as the caterpillar, currant-worm, cucumber beetle, etc., and these must be fed a poison which they will take into their stomachs with the leaf.

Liquid Insecticides and Poisons Are Not Permitted in the Mails.

All Prices Subject to Market Changes

CHRISTMAS TREES

Again this season we have the same reliable cutter who has been cutting trees for Barnard's for many seasons. These come from the Wisconsin swamps where we get the choicest well-branched spruce trees—and an occasional balsam—of fine shape.

All of our trees are carefully selected for form, quality and appearance, and inspected by our agents before tying. They are graded and bundled so as to retain their natural beauty and shape.

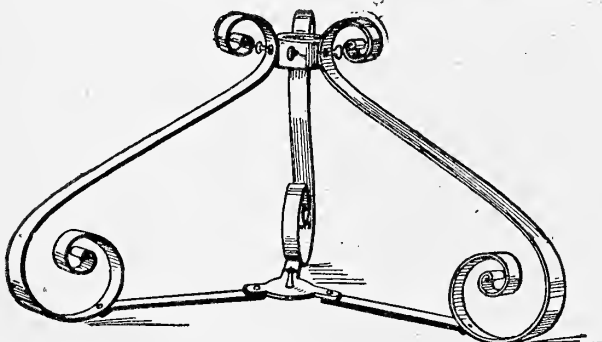

Indications are that the supply will be short this season, so early ordering is advised. (We do not break bundles).
